

Misyonumuz

İnsanların hayatlarını kolaylaştıracak yenilikçi, emniyetli, güvenilir ve konforlu dikey taşıma çözümleri sunmak.

Our Mission

To provide innovative, safety, reliable and comfortable vertical transportation solutions that will make people's lives easier.

Misyonumuz

Teknolojiye ve insana yatırım yapan, müşterilerine kaliteli ve sürdürülebilir ürün ve hizmet sunan Pazar lideri bir firma olmak.

Our Vision

To be a market-leading company that invests in technology and people, offers quality and sustainable products and services to the customers.

Değerlerimiz

- Güvenilirlik ve dürüstlük tartışılmaz ilkelerimizdir.
- En önemli sermayemiz insan kaynağımızdır.
- Ekip olarak çalışırız.
- Müşteri Odaklıyız.
- Tüm paydaşlarımızla işbirliğine dayalı samimi ilişkiler kurarız.
- Faaliyet gösterdiğimiz ülkelerde yasalara uyumlu hareket ederiz.
- Farklılıklardan doğan zenginliğin gücüne inanırız.
- Her çalışanımızın kendini rahat ve güvenli hissedeceği çalışma ortamı sağlarız.
- Sorumluluklarımızın bilincindeyiz.
- Çevreye ve topluma saygı gösteririz.

Our Principles

- Reliability and honesty are our indisputable principles.
- Our most important capital is human resources.
- We work as a team.
- We are customer-oriented.
- We establish sincere relations based on cooperation with all our working partners.
- We act in accordance with the laws in the countries where we operate.
- We believe in the power of wealth arising from differences.
- We provide a working environment in which every employee will feel comfortable and safe.
- We are aware of our responsibilities.
- We respect the environment and society.

Hakkımızda

2015 yılında Iğdır Organize Sanayi Bölgesinde 3000m2'si kapalı olmak üzere toplam 10.000 m2'lik alanda kurulan firmamız, Doğu Anadolu bölgesinde paket asansör ve ekipmanları üretimi yapan tek imalat fabrikasıdır. Şirketimiz asansör imalatı konusunda uzun yıllar tecrübe kazanmış şirketlerden gerekli alt yapı desteğini almıştır. Firmamız Türkiye ve dünya daki asansör üretim standartlarına göre üretim yapmaktadır. Ürünlerimiz bilgisayar ortamında CAD programları aracılığıyla tasarlanıp kusursuz olarak üretilmektedir. Ürün yelpazemizde insan asansörleri, yük asansörleri, sedye asansörleri, servis asansörleri üretim ve asansör malzemeleri satışı bulunmaktadır. Avelice Asansör, Iğdır ilinin stratejik konumundan dolayı Azerbaycan, İran, Gürcistan ve Nahçıvan'a ihracat yaparak hizmet yelpazesini genişletmiştir. Avelice Asansör nitelikli insan kaynağı, güçlü alt yapı ve çözüm odaklı yaklaşımı ile satışının her aşamasında ve sonrasında müşterilerinin her zaman yanındadır.

About Us

Our company, which was established in 2015 in Iğdır Organized Industrial Zone on a total area of 10,000 m2, 3000 m2 of which is closed, is the only manufacturing factory in the Eastern Anatolia region in Turkey that produces package elevators and equipment. Our company has received the necessary infrastructure support from companies that have gained experience in elevator manufacturing for many years. Our company is engaged in manufacturing according to lift production standards in Turkey and the world. Our products are designed and produced perfectly in computer environment using CAD programs. Our products includes human elevators, freight elevators, hospital elevators, service elevators production and elevator materials sales. Avelice Elevator has expanded its service range by exporting to Azerbaijan, Iran, Georgia and Nakhichevan due to the strategic location of the province of Iğdır. With its qualified human resources, strong infrastructure and solution-oriented approach, Avelice Elevator is always with its customers at every stage of and after sales.

MRL Sistem

Kuyuya açılan bir kapı ile tüm sisteme müdahale etmek mümkündür. Dişlisiz makinelerin kullanımı ile makine dairelerine ihtiyaç kalmamıştır. Frekans kontrollü makinemiz ile kalkış ve duruşlarda konfor, kat ayarlarında hassasiyet maksimum seviyeye ulaşmıştır. Geleneksel motorlara kıyasla %40'a varan enerji tasarrufuna ek olarak, dişli kutusu olmaması nedeniyle aşınma son derece düşüktür. Sistemin tamamen yağsız olması çevre kirliliği ve yangın riski olmaması

MRL System

it is possible to intervene in the entire system via a door opening to the well. With the usage of Gearless machines there is no more a necessity for machine rooms. With our frequency-controlled machine, comfort in take-offs and stops and sensitivity in floor settings have reached the maximum. In addition to energy savings of up to 40% compared to conventional motors, wear is extremely low due to the absence of a gearbox. The fact that the system is completely oil-free there is no environmental pollution and risk of fire

MR Sistem

Asansör boşluğu dışında makine dairesi de bulunmaktadır. Makine dairesine açılan bir kapı ile tüm sisteme müdahale etmek mümkündür. Makine dairesi asansörlerde hem Dişlisiz hem de dişli makineler kullanılmaktadır. Frekans kontrollü makinemiz ile kalkış ve duruşlarda konfor, kat ayarlarında hassasiyet maksimum seviyeye ulaşmıştır. Klasik motorlara göre %40'a varan enerji tasarrufu sağlar. Redüktörlü motor kullanıldığında yağ bakımı periyodik olarak yapılmalıdır.

MR System

Apart from the elevator shaft, there is also a machine room. It is possible to intervene in the whole system through a door to the engine room. Both Gearless and geared machines are used in elevators that have machine rooms. With our frequency-controlled machine, comfort in take-offs and stops and sensitivity in floor settings have reached the maximum. It provides energy savings of up to 40% compared to conventional motors. Oil maintenance should be done periodically when geared motor is used.

- 4 : Hidrolik Pompa
- 5 : Kontrol Panosu

- 1 : Rail
- 2 : Cylinder
- 3 : Cabin Frame
- 4 : Hydraulic Pump
- 5 : Control Panel

Hidrolik Sistemler

Kaldırma işi, kabini doğrudan veya dolaylı olarak etkileyen bir kaldırıcıya hidrolik sıvı sağlayan elektrikle çalışan bir pompa vasıtasıyla gerçekleştirilir. Bu asansörlerde aşağı doğru hareket kabinin ağırlığı ile gerçekleşir. Hidrolik asansörlerde makine dairesi genellikle ilk durak seviyesinde yer alır. Yağ kazanı ve hidrolik makine (montaj), kumanda panosu ve hidrolik akışkanın geçtiği hortumlar bulunmaktadır. Asansör boşluğunun içindeki bileşenler: kabin, karşı ağırlık (varsa), silindir-piston sistemi, süspansiyon tertibatı ve tamponlardır.

Pompanan yağ, belirli şartları yerine getirerek hidrolik makineden geçer ve borular vasıtasıyla silindire harekete geçirir. Silindir doğrudan veya dolaylı olarak kabine bağlanabilir. Silindirin ittiği kabin, alınan kumanda ile istenilen kata hareket ettirilir.

Hydraulic System

Lifting work is carried out by means of an electrically driven pump that delivers hydraulic fluid to a lifter that directly or indirectly affects the cabin. In these elevators, the downward movement is realized by the weight of the cabin. In hydraulic elevators, the engine room is generally located at the first stop level. There is an oil boiler and hydraulic machine (assembly), control panel and hoses through which the hydraulic fluid passes. Inside the elevator shaft the components are: cabin, counterweight (if any), cylinder-piston system, suspension device and buffers.

The pumped oil passes through the hydraulic machine, fulfilling certain conditions, and activates the cylinder through the pipes. The cylinder can be directly or indirectly connected to the cabinet. The cabin pushed by the cylinder is moved to the required floor with the received control.

SERVİS SİSTEMİ

SERVICE SYSTEM

Servis Asansörü

Servis asansörleri, 50 ila 300 kg arasındaki yükleri taşımak için tasarlanmış küçük yük asansörleridir. Servis asansörleri restoranlarda, kütüphanelerde, villalarda, hastanelerde ve ofislerde kullanılmaktadır. Restoranlarda genellikle yiyecek ve tabak taşımak için kullanıldığı için hijyen koşulları büyük önem taşımaktadır. Kabin içi paslanmaz çelik ve antibakteriyel malzemeden üretilmiştir.

Service Lift

Service elevators are small freight elevators designed to carry loads between 50 and 300 kg. Service elevators are used in restaurants, libraries, villas, hospitals and offices. Since it is generally used to carry food and plates in restaurants, hygienic conditions are of main importance. The cabin interior is made of stainless steel and antibacterial material.

VİLLA ASANSÖRÜ

HOME LIFT

Villa Asansör Sistemi

Ev asansörleri, inşaat sırasında veya mevcut binalara küçük tadilatlarla entegre edilmesi kolay, her şey dahil bir asansör kompleksidir. Tasarım, geniş renk ve malzeme seçeneklerimiz ile her proje mimari yapının statik ve tarzına uygun olarak gerçekleştirilmektedir. Proje bazlı çalıştığı için her türlü ebat ve kaplama seçenekleri değerlendirilmektedir.

Home Lift System

Home elevators are an all-inclusive elevator complex that is easy to integrate during construction or with minor renovations to existing buildings. With our design, wide color and material options, each project is carried out in accordance with the static and style of architectural structure. Since it works on a project basis, all kinds of size and coating options are evaluated.

HASTANE ASANSÖRÜ

HOSPITAL LIFT

Hastane Asansörü

Sedyeli asansörler olarak da bilinen hastane asansörleri, sedye üzerinde yatan hastaların taşınması için tasarlanmıştır. Sedyeli asansörler hastaların daha rahat ve güvenli taşınması için özel çalışma gerektirir. Sedyeli asansörlerin hızı çok yüksek değil, kabinler antibakteriyel olarak tasarlanmış, kabin aydınlatması hastaları rahatsız etmeyecek seviyede, kapıları daha geniş ve butonlara ulaşım daha kolay.
